

Concordance® Image

Work with confidence to meet every litigation production challenge

Concordance Image is the fast and easy way for litigation teams to view, organize, and share scanned discovery documents in preparation for trial. It puts power and simplicity in your hands, so you can automate administrative tasks and achieve the highest quality results. Smooth integration with Concordance® and Concordance® FYI™ software further simplifies how you receive and deliver images.

ESSENTIAL TOOLS

Professional Image Viewing

Quickly retrieve and view images side by side with the document text in a Concordance database:

- Find images by production, Bates number, date, author, etc.
- Displays black & white and colour images
- Zoom, pan, scroll, rotate, and use new sticky rotate to view all images in the same rotational direction
- Resize and enhance image readability with gray scaling
- Recognizes a large number of image formats: BMP, CALS, DCX, GIF, JPEG, LD, MARS, NAVSEA, NIFF, PCX, PDA, TIFF, TMS

Precision Editing

Allows you to flag important information and redact confidential sections:

Concordance Image lets you:

- Display images in perfect synch with Concordance
- Quickly organize documents
- Easily create and edit annotations
- Burn redactions onto productions
- Protect original image integrity
- Conduct high-volume printing
- Access images from anywhere in the world using Concordance® FYI™
- Share images with leading trial presentation software
- And much more
- Add colour highlighting, shapes (arrows, boxes, etc.), and annotations and notes
- Insert customized redaction stamping, e.g., solicitor/client privilege
- Retain image integrity by saving all markups, annotations, and redactions as an overlay file
- Search redlines by type (redactions, notes, etc.), author, or content
- Synchronize image base with new replication feature

Superior Production Tools

Easily organize discovery and create new document productions from your database queries:

- Renumber production sets to eliminate page gaps and brand with new Bates numbers or barcodes
- Burn in redactions, redlines, highlights, image keys, barcodes, custom notes, and text from database fields into documents
- Separate or consolidate TIFF images with one click
- Create a subset imagebase; easily save and export image sets to CD or DVD as a new imagebase
- Organize images for CD or DVD production by specifying volume directories and volume size, eliminating document breaks between volumes
- Write production numbers back to your Concordance database for easy tracking and reporting

Advanced Printing

Make high-volume print runs painless:

- Select single or batch image printing
- Print or suppress redactions, annotations, redlines, highlights, and notes
- Add text from database fields to divider sheets
- Print auto-increment production numbers
- Calculate total pages before printing
- Print divider sheets and pull from separate printer trays

Presentation in the Courtroom

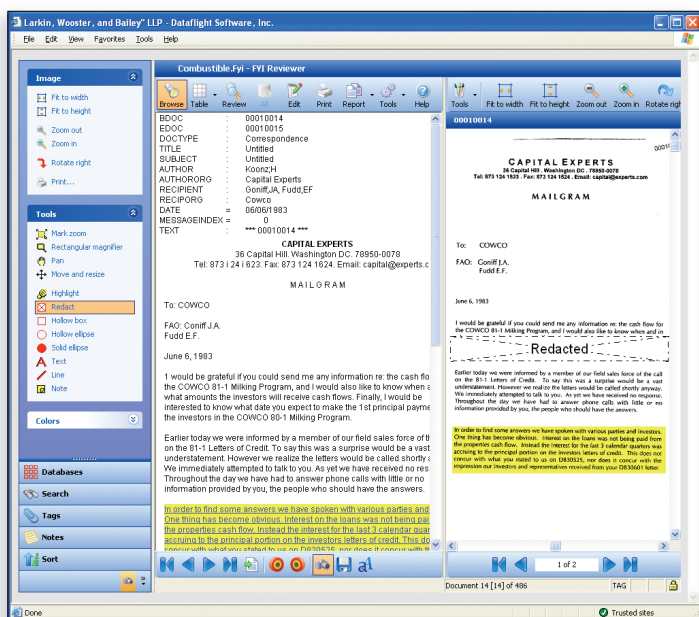

Pinpoint just the right evidence for presentation to the trier of fact:

- Magnify and highlight trial exhibits on-screen
- Maximize screen viewing with Presentation mode
- Access barcode images
- Quickly send images to Sanction or Trial Director

Straightforward and Easy to Use

Designed to support all levels of users and to help minimize the learning curve:

- Simple installation and configuration
- Intuitive icon-driven interface includes floating tooltips, clear documentation, and context-sensitive help

FYI™ Extends the Power and Reach of Concordance Image

FYI software is designed to extend the powerful functionality of Concordance and Concordance Image beyond the desktop and onto the web. Now lawyers, paralegals, and litigation support staff can access their case-critical information and collaborate from anywhere in the world with ease and accuracy.

- Authorized users can access a remote imagebase as easily as if it were stored on their PC or local network
- Images can be scaled down to as little as 10 per cent of the original size to enhance transfer speed and preserve bandwidth
- Remote offices, co-counsel, and clients can collaborate on details and share images without sacrificing the integrity of case data or privilege
- Discovery documents and data are fully protected as they are shared internally and externally

System Requirements

- Microsoft® Windows® 98/2000/NT/XP
- Personal computer with a Pentium® 100 or higher processor
- 128 MB of RAM
- 20 MB of available hard disk space
- 800 x 600 display, 256 colours
- Windows compatible mouse
- CD-ROM drive
